SUMMARY

Founding AI Engineer with 2+ years of experience building and scaling production AI systems. Built a job-search platform to 10k+ users and deployed 10+ enterprise-grade AI agents for healthcare and recruiting. Specialized in Agentic Workflows (LangGraph/CrewAI), Voice AI latency optimization (<500ms), and RAG Architecture. Seeking Founding role to bridge the gap between rapid prototyping and production-grade AI infra

WORK EXPERIENCE

CellaNova Technologies Founding AI Engineer	May 2025 - Present
- Architected and deployed an autonomous Multi-Agent orchestration system using LangChain and AWS Bedrock to automate grant intelligence and clinical workflows for 10+ clients, reducing document processing time by 36%. - Engineered a hybrid RAG pipeline using Pinecone and FAISS with cohere reranking, improving retrieval precision for complex clinical documentation by 40% compared to standard vector search. - Designed a multi-tenant AWS infrastructure using Terraform, enabling 1-click deployment of client-isolated environments, reducing onboarding time by 60%. - Implemented custom Prompt Guardrails and PII masking layers to ensure HIPAA-compliant data handling across all LLM-integrated workflows.	
ApplyLoom (Founding Project) Founding Engineer	Aug 2024 - Dec 2024
- Scaled a Next.js platform to 1,000+ active users, architecting a Chrome Extension to intercept and semantically process 1k+ daily job applications across LinkedIn, Indeed, and Glassdoor. - Engineered a Multimodal Multi-Agent Coaching Assistant that utilizes vision-grounded LLMs to analyze job postings and user resumes; implemented a Supervisor-Worker architecture to extract recruiter intent and provide real-time fit-scoring. - Engineered an intent-based model router that optimizes for Persona Fit; utilized a custom emotional intelligence (EQ) stack for soft-skill simulation (Recruiter/HM personas) and leveraged frontier SOTA models for technical extraction, ensuring a 30% increase in user-perceived coaching realism.	
Cypheryard AI Software Developer	Jan 2023 - Jun 2023
- Developed a low-latency production Voice AI Agent using Twilio Media Streams and Amazon Transcribe; optimized the WebSocket pipeline to achieve sub-800ms turn-taking latency. - Orchestrated an automated outbound outreach engine using SQS and Lambda, scaling candidate engagement by 5x without increasing recruiter headcount.	

PROJECTS

MarketPulse API Node.js (Apollo Server), PostgreSQL, Redis, Docker, AWS Fargate	Oct 2024 - Dec 2024
- Engineered a scalable GraphQL microservice in Java using Spring Boot and Spring GraphQL, leveraging Spring Data JPA with Hibernate to persist normalized product and pricing data into PostgreSQL - Containerized the service with Docker and deployed via Kubernetes on AWS EKS using Helm charts; implemented JWT-based authentication with Spring Security, enabled real-time GraphQL subscriptions reducing front-end integration effort by 60%.	
PantryMan ReactJS, Go (Gorilla Mux/WebSocket, goroutines), Docker, GCE	Aug 2024 - Oct 2024
Developed a Go microservice with Gorilla Mux and goroutines to track item counts, trigger low-stock email alerts, and update a collaborative to-buy list, containerized in Docker and deployed on GCE for 99.9% uptime.	

EDUCATION

Master of Science in Computer Science	May 2025
Arizona State University, Tempe, AZ, US.	3.67/4.0 GPA
Bachelors of Technology in Computer Science specialization in IOT	May 2023
Vellore Institute of Technology, Vellore, TN, India.	8.54/10.00 GPA

TECHNICAL SKILLS

Agentic AI & Eval: LangChain, LangGraph, RAGAS (Evaluation), Prompt Engineering, Agentic Workflows, OpenAI/Bedrock APIs
Voice & Real-time: Twilio Media Streams, WebRTC, Amazon Transcribe Streaming, Real-time STT/TTS
Data & Vector: Pinecone, FAISS, PostgreSQL (pgvector), Supabase, DynamoDB
Infrastructure: AWS (ECS, Lambda, SQS, S3), Docker, Terraform (IaC), GitHub Actions (CI/CD)
Full Stack: TypeScript, Next.js, FastAPI, Node.js, Python
